

ACSM

WHAT WE DO

ACSM (Advanced Crew and Ship Management) provides global maritime services such as nautical management of vessels as well as complete ROV services for offshore projects worldwide. Established in 2001, ACSM key personnel have more than 25 years of experience in marine and subsea services for offshore operations.

SUBSEA SERVICES:

Full ROV services, vehicles, operation and maintenance, Pilots/Technicians for ROV and sea Plough vehicles worldwide, ROV engineering.

ACSM operates and also provides ROV submersible systems services supplying Work Class hydraulic ROV systems, inspection electric ROVs, and subsea Cable Ploughs, with high qualified technical personnel (Supervisors, Pilots and Technicians) for operation, maintenance and management.

All of our employees are supported by our Senior Technical Department ashore, providing supervision for the offshore activities. We offer our know-how to any subsea project including ROV & Plough mobilization, operation, maintenance & repair, ROV tooling engineering and equipment supply.

For over 15 years ACSM personnel have worked with submersible systems aboard many cable ships and offshore vessels with almost all type of ROV systems including Perry Slingsby, SMD, Schilling, Saab-Seaeye, and Sub-Atlantic among others, as well as with SMD and EB submersible cable ploughs.

MARINE SERVICES:

Vessel managing & operation, ISM/ISPS, Technical Fleet Services, Crew recruitment, particularly for Cable and Offshore (DP) vessels with Diesel-Electric propulsion.

ACSM has a wide experience in ship management with cable ships, special purpose offshore vessels, oceanographic/research vessels, and other types of vessels with Dynamic Positioning (DP) and/or Diesel-Electrical propulsion. The Marine Management service includes Human resources (MLC 2006 Certification), and full Technical Management in compliance with relevant IMO conventions and other applicable international and flag state regulations.

SUBMARINE CABLE & OFFSHORE PROJECTS:

Submarine cable lay and burial, post lay cable inspection & repair (PLIB), survey works, Oil & Gas IMR, submarine rescue operations and wreckage recovery.

We have a wide experience in submarine cable lay, burial and post-lay cable inspection and repair, in deep water works, and the capability to provide Superintendents, Party Chief / Chief of Mission, cable engineers and jointers, and survey technicians.

Our company has a successful project track record around the world on vessel management, submarine cable lay and burial projects, PLIB works, ROV offshore installation and IMR operations, ROV commissioning, and ROV rescue operations.

CLIENTS

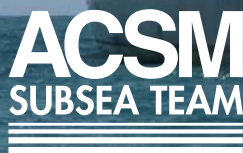

ACSM delivers specialized knowledge and solutions for offshore operations to our clients around the world. Our targets are operational efficiency, safety, and a cost effective service.

HQSE POLICY

ACSM is committed to provide effective people and equipment to achieve a constant improvement in SAFETY, HEALTH, QUALITY, and ENVIRONMENTAL management by meeting legal and regulatory requirements.
